b A separate blocking intervention

Six matched reruns

	Original	Guarded	Hypothesis	Evidence
	validated	in_progress	before / after	before / after
chem01	● →	☐	96 / 96	100 / 100
chem02	● →	☐	98 / 98	100 / 100
fin01	● →	☐	96 / 96	100 / 100
fin02	● →	☐	96 / 96	100 / 100
math01	● →	☐	96 / 96	100 / 100
math02	● →	☐	96 / 96	100 / 100

State changed; hypothesis and evidence scores did not.

Guard blocks every validated state; these six reruns are separate from the pilot.

All six terminal states were saved before a score-plot write failure.
